

Revolutionizing intralogistics MAV® 1500

MAV revolutionizes intralogistics by loading and moving any type of goods autonomously. Thanks to its integrated sensors, it can navigate and safely detect obstacles without requiring additional peripheral devices. Combining MAV with a collaborative or cognitive robot creates powerful mobile manipulator solutions.

Payload 1500 kg

Max. speed 1.5 m/s

Dimensions L 1530 mm x W 910 mm x H 293 mm

Up time 10 hours

With a payload of up to 1500 kg, MAV can efficiently pick up, transport and deliver pallets with all kinds of heavy goods.

Using the latest technology of laser scanners with a 360° vision, it can safely navigate in any intralogistics environment.

Application areas

Manufacturing

Warehouse

Automotive

Pharmaceutical

Aerospace

Service robots

Automotive

Packaging

Metals and

machinery

and hospital

beverage

Payload
Up to 1500 kg

Compact yet powerful

M/V * 500

MAV 500, the newest member of our MAV family, is your first choice whenever a strong but compact intelligent transport robot is needed.

Its compact dimensions allow it to navigate through tight spaces such as doorways, opening a wide range of applications – from laboratory automation to stock replenishment.

Payload 500 kg

Max. speed 1.5 m/s

Dimensions L 1255 mm x W 678 mm x H 294 mm

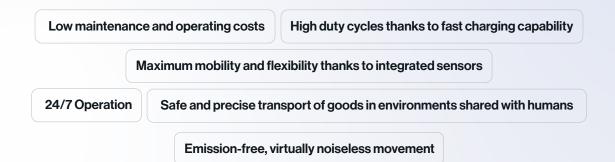

Up time 5 hours

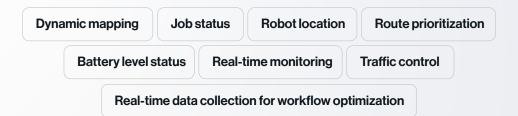

Advantages using MAV®

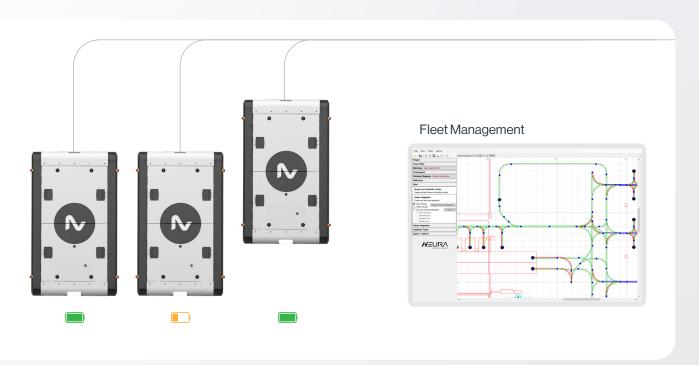

In order to satisfy the needs of our partners and customers, NEURA Robotics has developed specific solutions that meet the ever-increasing challenges. No matter what kind of loads manufacturers want to transport, MAV is the perfect solution to move heavy payloads with precision and efficiency.

Seamless fleet management

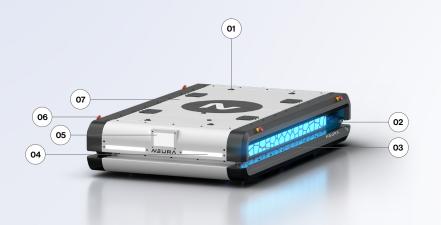

Dedicated software to efficiently streamline and control a group of MAVs, for instance as part of a system in a smart factory.

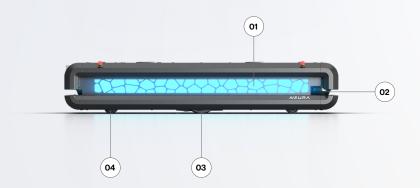

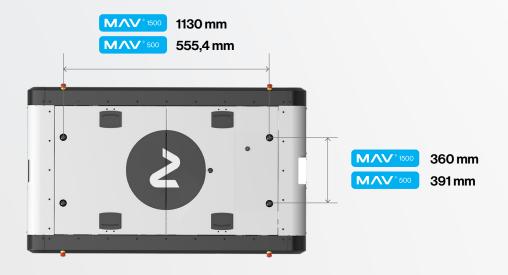

Overview

- 01 Lifting units
- 02 Laser scanner
- 03 LED status indicators
- **04** Direction indicator
- 05 HMI touch screen
- **06** Emergency stop button
- 07 Cover

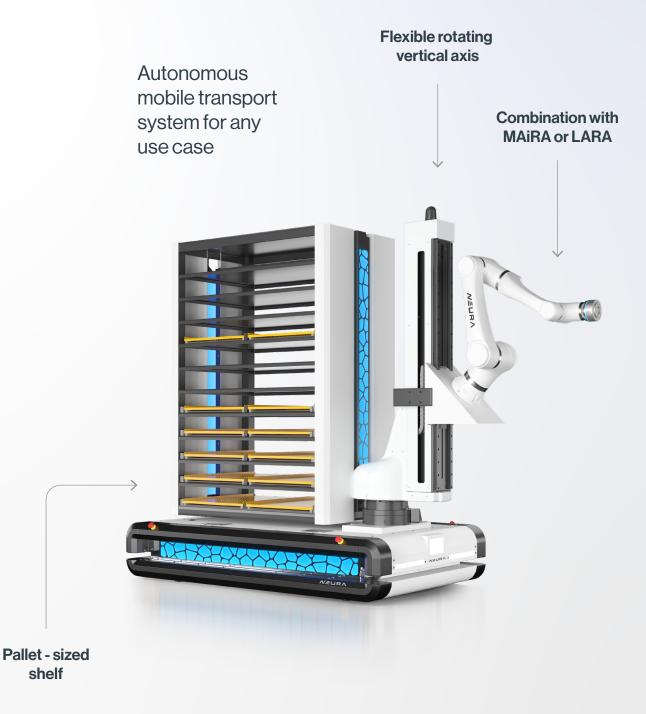

- 01 LED status indicators
- 02 Laser scanner
- 03 Drive wheels
- **04** Universal wheels

Mobile manipulator solutions for a maximum of flexibility

Combining MAV with a collaborative or cognitive robot enables complete process automation, significantly reducing the time required for a single operation. The combination of this system with a shelf allows smooth handling of all types of production parts.

^{*} One of many examples of MAV+ applications. Contact us to discuss your customized solution.
